

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

1. (original) A method for producing plant material comprising:
  - a. creating a raised planting bed;
  - b. covering the bed with a water-permeable weed barrier;
  - c. inserting a hole into the bed;
  - d. placing a container plant into the hole; and
  - e. providing a directed water line to the container plant.
2. (original) The method of claim 1, wherein the directed water line is an individual water line to the container plant.
3. (currently amended) The method of claim 2, further comprising ~~wrapping the container plant with~~ providing a rooting deterrent material ~~prior to placing the~~ between the container plant ~~[[in]]~~ and the inside of the hole.
4. (original) The method of claim 1, further comprising providing a moisture delivery line for controlling the temperature of the raised planting bed.
5. (original) The method of claim 2, further comprising providing a driptape for controlling the temperature of the raised planting bed.
6. (currently amended) The method of claim 1, further comprising ~~wrapping the container plant with~~ providing a rooting deterrent material ~~prior to placing the~~ between the container plant ~~[[in]]~~ and the inside of the hole.

7. (original) The method of claim 2, wherein the directed water line includes a spray emitter positioned for directed watering of the container plant.
8. (original) The method of claim 7, wherein the spray emitter is attached to a container holding the container plant.
9. (original) The method of claim 8, further comprising providing a driptape for controlling the temperature of the raised planting bed.
10. (original) A planting bed for container plants comprising:
  - a. a raised planting bed;
  - b. a weed-deterring material covering the raised planting bed;
  - c. a container plant contained in a hole in the raised planting bed; and
  - d. a water line directed to the container plant.
11. (original) The planting bed of claim 10, further comprising a temperature controlling line beneath the weed-deterring material for controlling the bed temperature.
12. (original) The planting bed of claim 11, wherein the temperature controlling line is a driptape.
13. (currently amended) The planting bed of claim 12, ~~wherein the container plant is wrapped in~~ further comprising a rooting-deterrent material between the container plant and the hole in the raised bed.
14. (currently amended) The planting bed of claim ~~[[1]]~~ 10, wherein the container plant is wrapped in a rooting-deterrent material.

15. (currently amended) The ~~method~~ planting bed of claim 10, wherein the water line includes a spray emitter and is an individual line to the container plant.
16. (currently amended) The planting bed of claim 11, wherein the water line includes a spray emitter ~~[[is]]~~ attached to a container holding the container plant.
17. (currently amended) The planting bed of claim ~~[[2]]~~ 12, wherein the water line includes a spray emitter and is an individual line to the container plant.
18. (original) The planting bed of claim 17, wherein the spray emitter is attached to a container holding the container plant.
19. (original) The planting bed of claim 13, wherein the water line includes a spray emitter and is an individual line to the container plant.
20. (currently amended) The planting bed of claim ~~[[1]]~~ 11, wherein the water line includes a spray emitter and is an individual line to the container plant.
21. (original) The planting bed of claim 20, wherein the spray emitter is attached to a container holding the container plant.

Claims 22-25 (canceled)

26. (new) A method for growing container plants comprising:
  - a. providing a container plant in a raised bed, wherein the raised bed includes a cover material;
  - b. providing a temperature control line beneath the cover material to control temperature in the raised bed surrounding the container plant;  
and
  - c. providing a watering line for hydrating inside the container plant.
27. (new) The method of claim 26 wherein the cover material is a water-permeable weed barrier.
28. (new) The method of claim 27, wherein the temperature control line moistens the bed surrounding the container plant.
29. (new) The method of claim 28, wherein the temperature control line includes driptape.
30. (new) The method of claim 29, wherein the water line includes a spray emitter.
31. (new) The method of claim 28, further comprising:
  - a. providing a plurality of container plants in the raised bed; and
  - b. providing each container plant with an individual watering line.
32. (new) The method of claim 30, wherein an individual watering line includes a spray emitter.
33. (new) The method of claim 27, further comprising providing a rooting-deterrent material between the container plant and a hole in the bed holding the container plant.

34. (new) The method of claim 26, further comprising:
- a. providing a plurality of container plants in the raised bed; and
  - b. providing each container plant with an individual watering line.
